

# ABDUGANIEV FAYZULLO SOLIJON UGLI

## Front-End Developer

Seoul, South Korea | fayzullo.coder@gmail.com | GitHub: DevFayzullo | Portfolio: devfayzullo.life

### SUMMARY

Detail-oriented Front-End Developer focused on building modern, responsive, multilingual web apps with React and Next.js. Strong in component architecture, i18n, SEO fundamentals, and UI/UX implementation with Tailwind CSS. Actively improving full-stack skills (Node.js / Express) and delivering production-ready projects with CI/CD and clean code practices.

### SKILLS

**Frontend:** React, Next.js, TypeScript, JavaScript, HTML, CSS

**UI:** Tailwind CSS, Responsive Design, Accessibility (basic)

**i18n/SEO:** next-intl, i18next, metadata/OG tags, sitemap/RSS (project-based)

**Tooling:** Git/GitHub, ESLint, pnpm, Vercel, Netlify

**Quality:** Vitest, Playwright (project-based)

### PROJECTS

#### 1. Developer Portfolio (React + Tailwind + EmailJS)

- Built a modern responsive personal portfolio with project showcase, About section, and social/footer navigation.
- Added multilingual UI (EN/UZ/KO/RU) with i18next and implemented light/dark theme layout.
- Integrated a working contact form using EmailJS and structured the app for easy customization via JSON project data.

**Tech:** React, Tailwind CSS, Vite, EmailJS, i18next, Lucide React

[Repo](#) | [Live](#)

#### 2. Modern MERN E-commerce App (MERN + JWT)

- Developed a MERN e-commerce app with product catalog using slug-based product pages and persistent cart behavior.
- Implemented authentication using JWT and protected user flows (login/register + session handling).
- Built admin-side product management (CRUD) to create/update/delete products and manage catalog content.

**Tech:** MongoDB, Express, React, Node.js, JWT, (UI library/Tailwind – siz to'g'rilaysiz)

[Live](#)

#### 3. Multi-Language Blog Platform (Next.js 15 + TypeScript)

- Built a production-ready multilingual blog platform with Next.js App Router + TypeScript supporting Korean/English/Uzbek routing.
- Implemented MDX authoring with frontmatter metadata, tag filtering + search (Fuse.js), and system-aware dark/light theme.
- Improved discoverability with SEO features (OG tags, sitemap, RSS, hreflang) and automated delivery using GitHub Actions + Vercel CI/CD.

**Tech:** Next.js 15, TypeScript, Tailwind CSS, next-intl, MDX, Framer Motion, Zod, Vitest, Playwright
